**Bespoke signage solutions for corporate, trade and retail.**

A-Signs are an innovative signage company based in the South West, we were established in 2002, offering a fast and efficient service that delivers quality products at competitive prices.

We design and manufacture a wide range of signage in-house at our workshop in Newton Abbot from self adhesive graphics right through to vehicle fleet branding.

Having a wealth of experience and knowledge in the signage trade, we can provide invaluable assistance in not only the production of your signage but also in the selection and design, with investment in the latest equipment, we are able to deliver quality and quantity without compromise.

# Design.

It all starts with great design.

Whether you have a design in place or need some inspiration, we are on hand to turn concepts into creations.

As well as our own in-house design team, we also work with a large number of design agencies and in-house design teams, to make sure your campaign stands out! We ensure your message carries across different platforms and that your branding is always on point.

Let's fill your blank canvas ...

## POINT OF SALE

Point of sale items are a critical component of any retail business. A huge number of brand purchase decisions are made on impulse, so you need to make sure your products stand out in-store and grab the attention of your customers. We supply a huge range of printed display, point of sale and FSDU's (free standing display units), from simple brochure holders through to bespoke merchandising units.

## WINDOW GRAPHICS

Window graphics are a very popular and effective way to cover windows and glass for privacy, advertising or just decoration.

With a choice from either simple single colour, frosted vinyl, or full colour digitally printed graphics, we can transform your windows from just a window to enhancing the look of your premises.

Now, we are able to print white which means we can achieve more vibrant and depth in colour patterns or shapes. These graphics can either be applied to the face or the reverse of the suggested areas.

We also offer a perforated contra vision media which allows you to see out but stops passers-by looking in!

# Case Studies.

**Client:** Bradfords Building Supplies

**Location:** UK

**Scope of Work:** We work with Bradfords across all of their 44 UK wide branches. We provide them with all types of signage and ongoing monthly promotional activities.

On the Helston project we worked with them from the initial architectural drawings to deliver all of their signage needs for a newly built branch.

This job involved large flexi faced signage, fabricated metal flag poles, stand off lettering, window, floor and wall graphics, along with directional, health & safety and point of sale signage.

**Client:** Wainhomes

**Location:** South West

**Scope of Work:** Wainhomes are one of the oldest established home builders in the country and it's a great privilege to be their sole signage contractor for all things south of Bristol. We provide all signage on new and existing developments along with artwork production, flags, plot boards, door wraps...the list is endless. Eddie, Wainhomes dedicated account director, acts as an extension to their marketing department, carrying out site visits, enacting marketing initiatives and advising on the best solutions to help Wainhomes 'fly the flag' across these fair lands.

**Client:** JML

**Location:** Newcastle

**Scope of Work:** We have been working with JML for a number of years providing them with their POS stands which are implemented in stores across the UK.

We are able to design, fabricate and distribute the free standing display units that you see in many of the UK's major retailers. From ironing board covers to pet play toys and iPad holders, all of the items you didn't know you needed are safely on display with your stand out FSDU's!

**Client:** Hut-3

**Location:** Exeter

**Scope of Work:** We understand how valuable an agency's reputation is and we take it very seriously. We are trusted by several across the country, no more so than Hut-3. We have carried out several jobs on their behalf for Torbay Pharmaceuticals. On this occasion, Hut-3 worked with the client to develop some amazing artwork and left it to us to bring them to life on the wall; 40 linear metres in this case. We also managed the electrical works, created the TV presentation, supplied and installed the LCD screen. All parties were very happy.

We will always strive to bring you the most eco friendly solutions available. Unfortunately the nature of this industry is not the most environmentally friendly, it produces a lot of residual waste as well as landfill products that cannot be recycled. We have recognised this, and now aim to bring our clients more sustainable options. The majority of our factory is run off solar power and where we need more power we use renewable energy. Most of our waste is recycled to avoid landfill.

Where possible, especially in the large format print and display options, we offer a recyclable alternative to appeal to the more environmentally conscious business.
